Solar Buddies

Solar Buddies is the first refillable child friendly sunscreen applicator that allows you to use a sunscreen of your choice. The applicator assists parents, teachers and

school staff in applying the lotion to children in a safe and convenient way whilst having the benefit of less mess and no waste! Kelli and Laura first had their idea for the applicator whilst discussing the 'No Touch Policies' most schools now have in place. "So, why not do something to help?" they thought! Solar Buddies are

great at giving parents peace of mind when their children are in school by knowing their child can top up their sunscreen. Solar Buddies are also a great teaching tool when explaining to your child the importance of being sunsafe.

They are great for backpacks and for those fun family days out. Available to purchase at www.solarbuddies.co.uk
